

A child dies every two weeks

when a TV, piece of furniture or appliance falls.

Please take a moment to review this safety information.

Together, we can help change this statistic.

To help prevent tip-over hazards, follow these simple yet effective safety tips:

- **Mount Flat-Screen and secure all TVs:** Mount these TVs to the wall or to furniture to prevent them from toppling over. Even TVs that are NOT wall mounted should be anchored to the wall.
- **Follow Instructions:** Follow the manufacturer's instructions to secure TVs and furniture properly.
- **Low and Stable:** CRT (box style) televisions should only be placed on furniture designed to hold a television and should be anchored to the wall or the TV stand.
- **Secure Furniture:** Existing furniture can be anchored with inexpensive yet effective anti-tip brackets. New furniture, such as dressers, are sold with anti-tip devices. Install them right away.
- **Remove Tempting Objects:** Remove items that might tempt kids to climb, such as remote controls or other intriguing objects, from the top of the TV and furniture.
- **Secure All Appliances:** Make sure free-standing ranges, stoves, washers, dryers and other appliances are installed with anti-tip brackets as appliances pose tip-over risks, too.
- **Supervise Children**—especially in rooms where these safety tips have not been followed—especially those where your child spends time away from home with other caretakers and family.

Even *short* furniture poses danger. Any furniture over 27" poses risk of fatality.

Use safety straps to anchor furniture securely to the wall.

Please please please—we implore you. Take a few moments now to anchor and secure TV's, furniture and appliances. It just might mean the difference between life and death.

Thank you for doing everything you can to help keep kids safe!
